EDUCATION

UNIVERSITY OF OREGON

Bachelor of Science in Computer Science

Eugene, OR

Graduation Date: June 2025 (Cum Laude)

Coursework/Skills: OOP & Python, Unix & Data Structures, Intermediate Data Structures & Algorithms, Computer Organization, C++ & Unix, Operating Systems, Intro to Artificial Intelligence, Software Methodology, MLOps, Principles of Programming Languages, Computer & Network Security, Modeling & Simulation, Machine Learning

PROJECTS

PeaceHealth Bike Stats

Eugene, OR

Full Stack Developer

February 2025 – March 2025

- Designed interactive visual tools—including hourly heatmaps and daily trend graphs—that supported trip planning and forecasting.
- Integrated open-source bike hub data to power real-time insights, enabling users to make data-driven decisions for urban travel.
- Enabled user-driven database updates and bike travel routing, improving route accuracy and increasing platform engagement by 45%.

PatternAuth MFA

Eugene, OR

Full Stack Developer

January 2025 – March 2025

- Integrated tri-factor authentication using research-backed pattern input, facial recognition, and physical device pairing.
- Delivered responsive, streamlined UI for both mobile and web platforms, improving login completion speed by 35%.
- Secured all sensitive user data with layered AES-256 encryption and salted hashing, achieving compliance with OWASP standards.

Personal Portfolio Website

Eugene, OR

Full Stack Developer

March 2025 – May 2025

- Built custom portfolio using Next.js and Tailwind CSS, avoiding templates to ensure full design control and performance tuning.
- Increased user interaction time with responsive layouts, subtle animations, and seamless GitHub project integration across devices.
- Deployed to custom domain joshjilot.com with HTTPS encryption, enhancing trust and professional presentation.

Student Dropout Prediction Webpage

Eugene, OR

Full Stack Developer

April 2025 – June 2025

- Built a web application to predict post-Class 12 dropout risk using LGBM, KNN, Logistic Regression, ANN, and ensemble models.
- Documented full data pipeline to fully justify pipeline decisions, covering imputation, transformation, scaling, and ordering decisions.
- Reported F1-score and AUC for all models, with model metrics (precision, recall, threshold, accuracy) displayed for transparency.

EXPERIENCE

Tutor

Eugene, OR

Private Programming Tutor

September 2023 – June 2024

- Promoted clean, maintainable coding practices, helping students adopt modular design, readable syntax, and efficient debugging techniques.
- Improved student coursework performance by 30% through targeted guidance on assignments, projects, and exam preparation.
- Tutored over 30 students in Python, emphasizing core programming concepts and structured problem-solving strategies.

Customer Support Associate

Eugene, OR

The Duck Store

July 2023 – June 2025

- Contributed to record location sales performance through consistent positivity, teamwork, and customer-focused service across daily operations.
- Built strong rapport with returning customers, fostering loyalty and repeat business through effective interpersonal communication.
- Maintained a calm, welcoming environment while resolving high-stress customer interactions, enhancing overall store atmosphere.

TECHNICAL SKILLS

Programming Languages: Python, C++, Swift, SQL, HTML/CSS, Bash/Unix Shell Scripting, SML, JavaScript
Frameworks & Libraries: React, Node.js, Next.js, Flask, Pandas, NumPy, TensorFlow, PyTorch, Scikit-learn, Matplotlib

Developer Tools & Technologies: Git, Command Line, MySQL, Docker, Netlify, Postman
